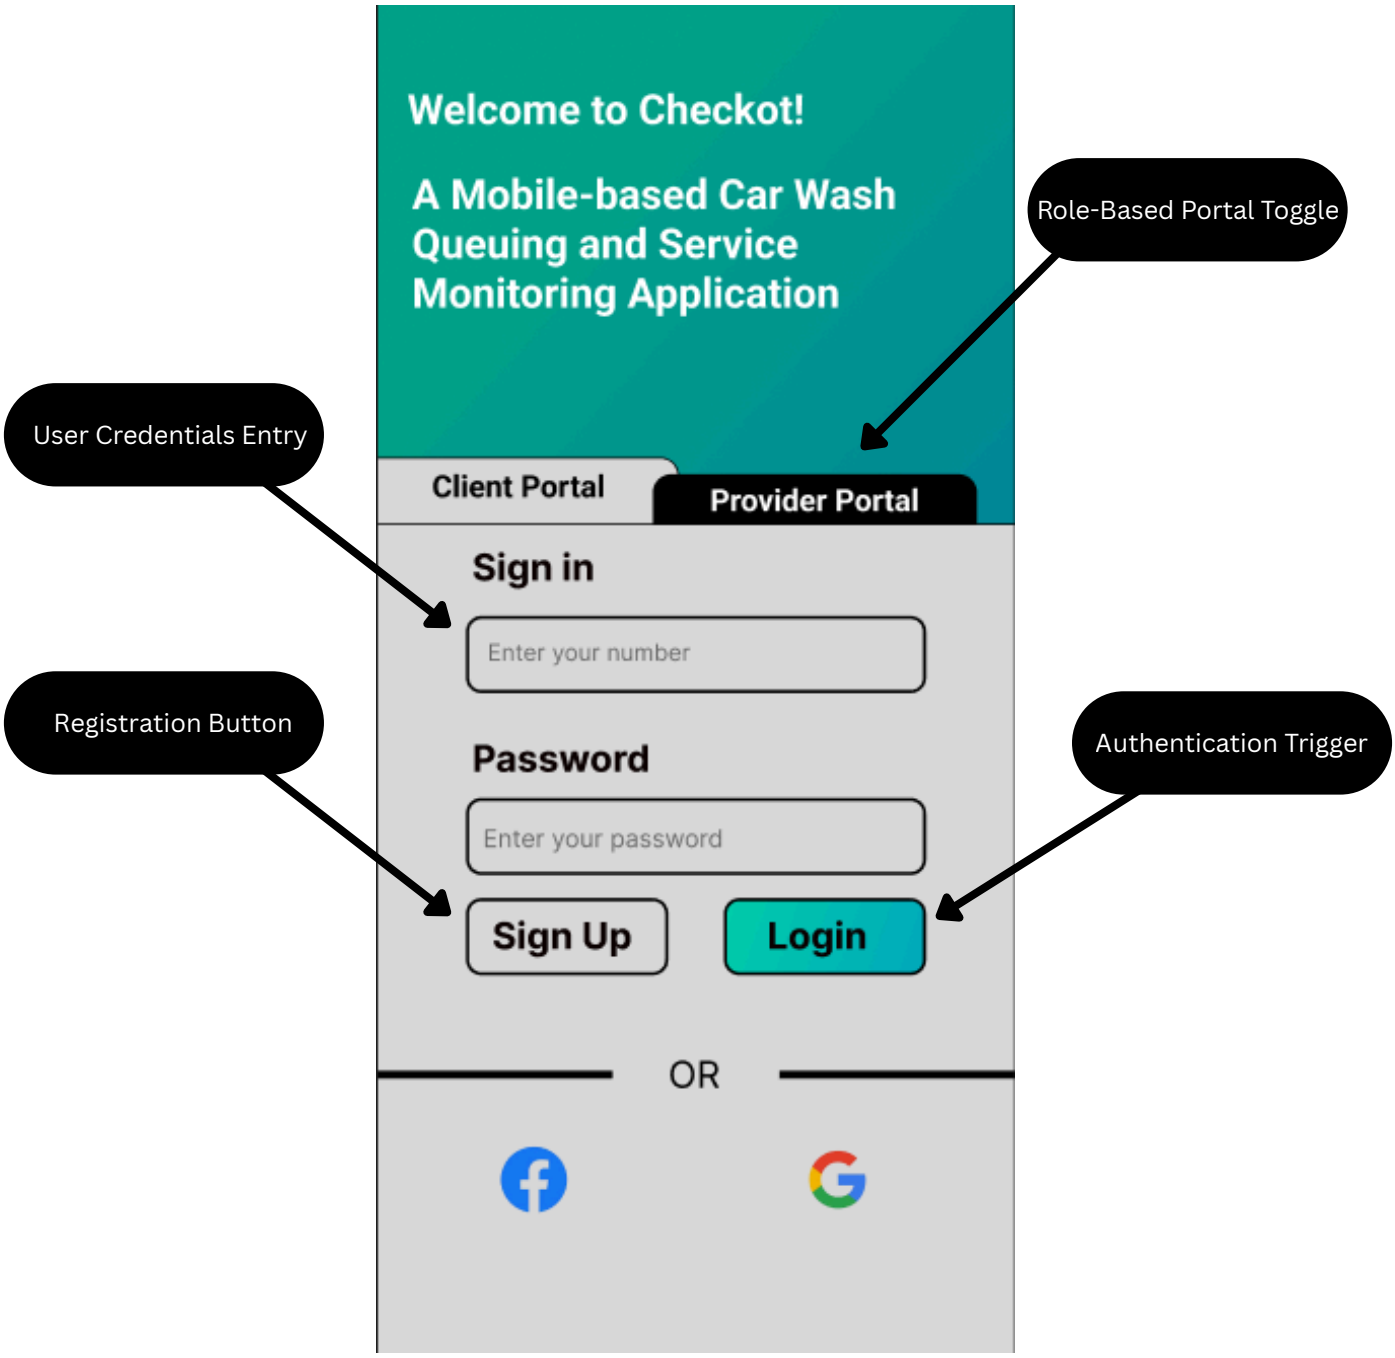
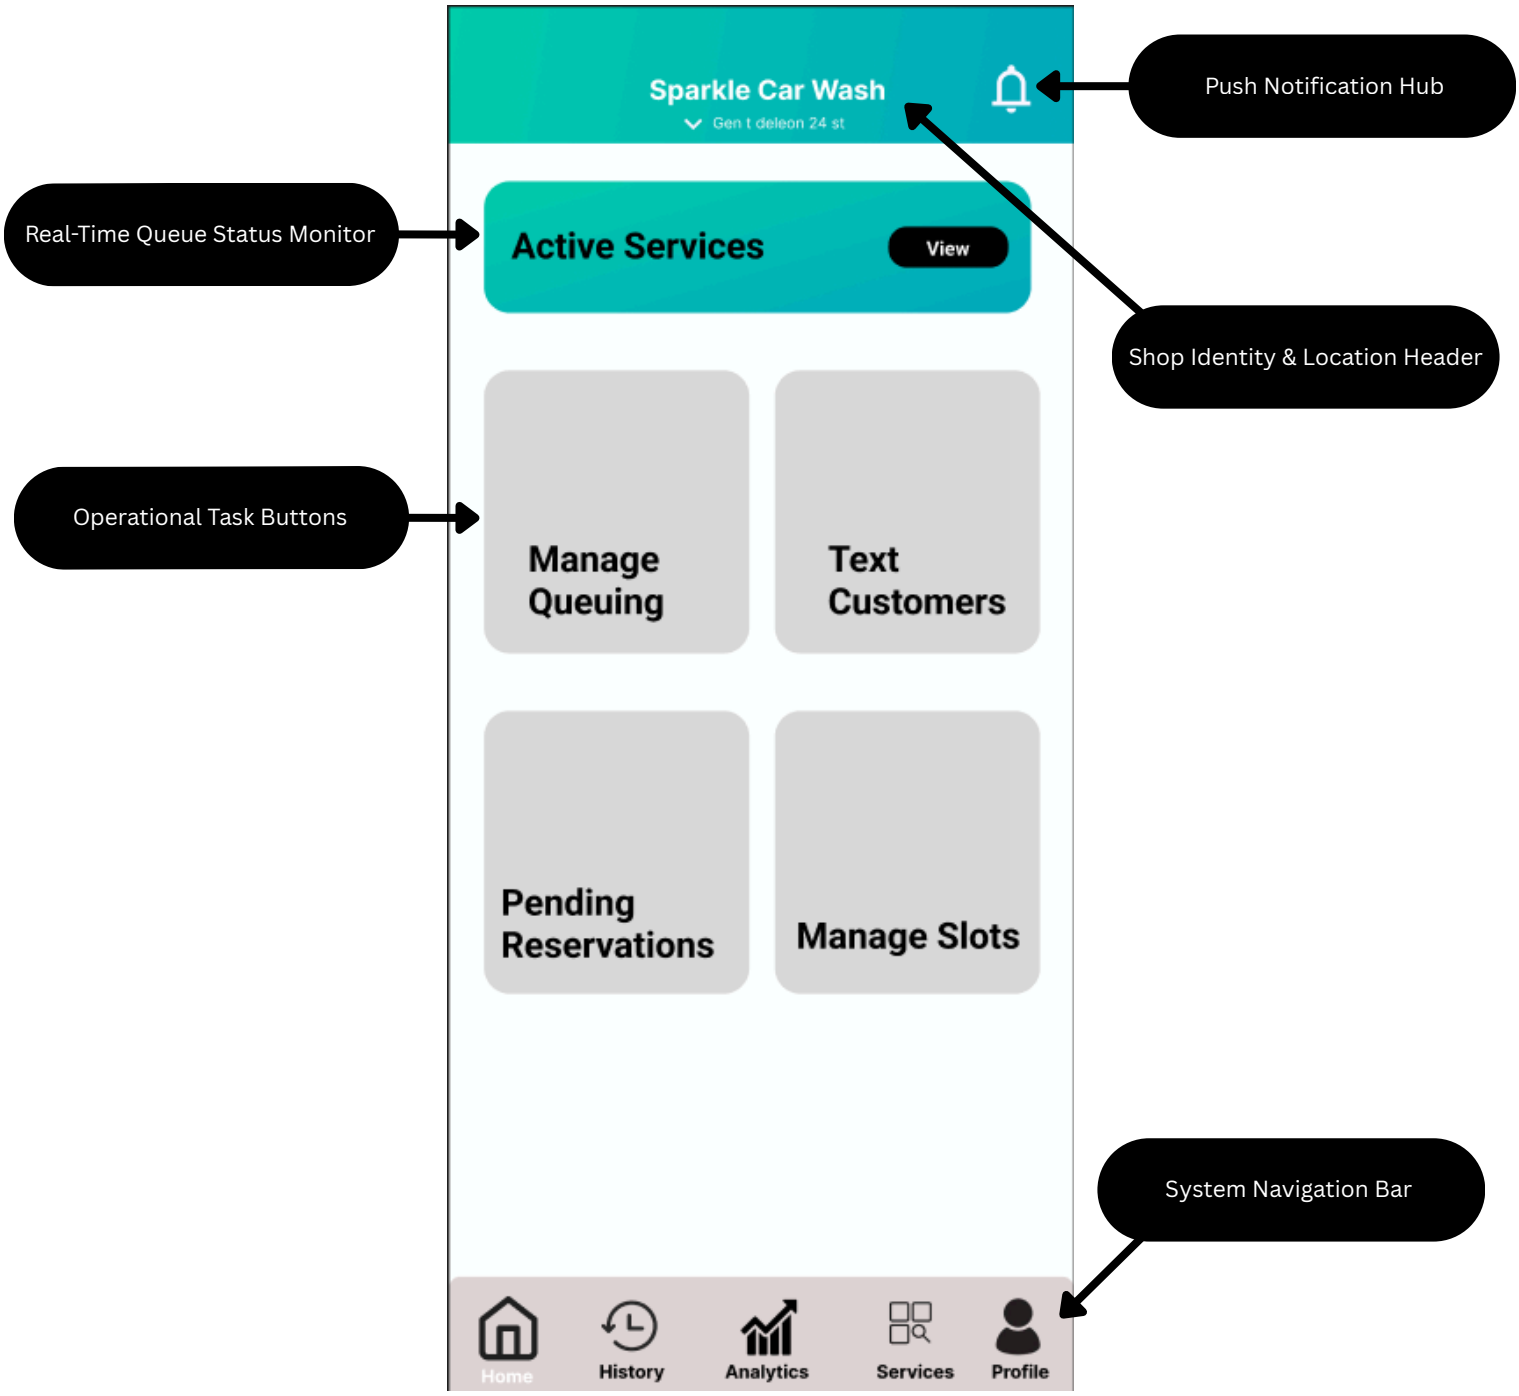
Login / User Authentication



Purpose: This screen serves as the secure entry point for the system, allowing users to toggle between the Client and Provider portals based on their role.

Integration Goal: It ensures that only authorized car wash owners can access management tools, supporting the system's goal of secure, role-based operational control.

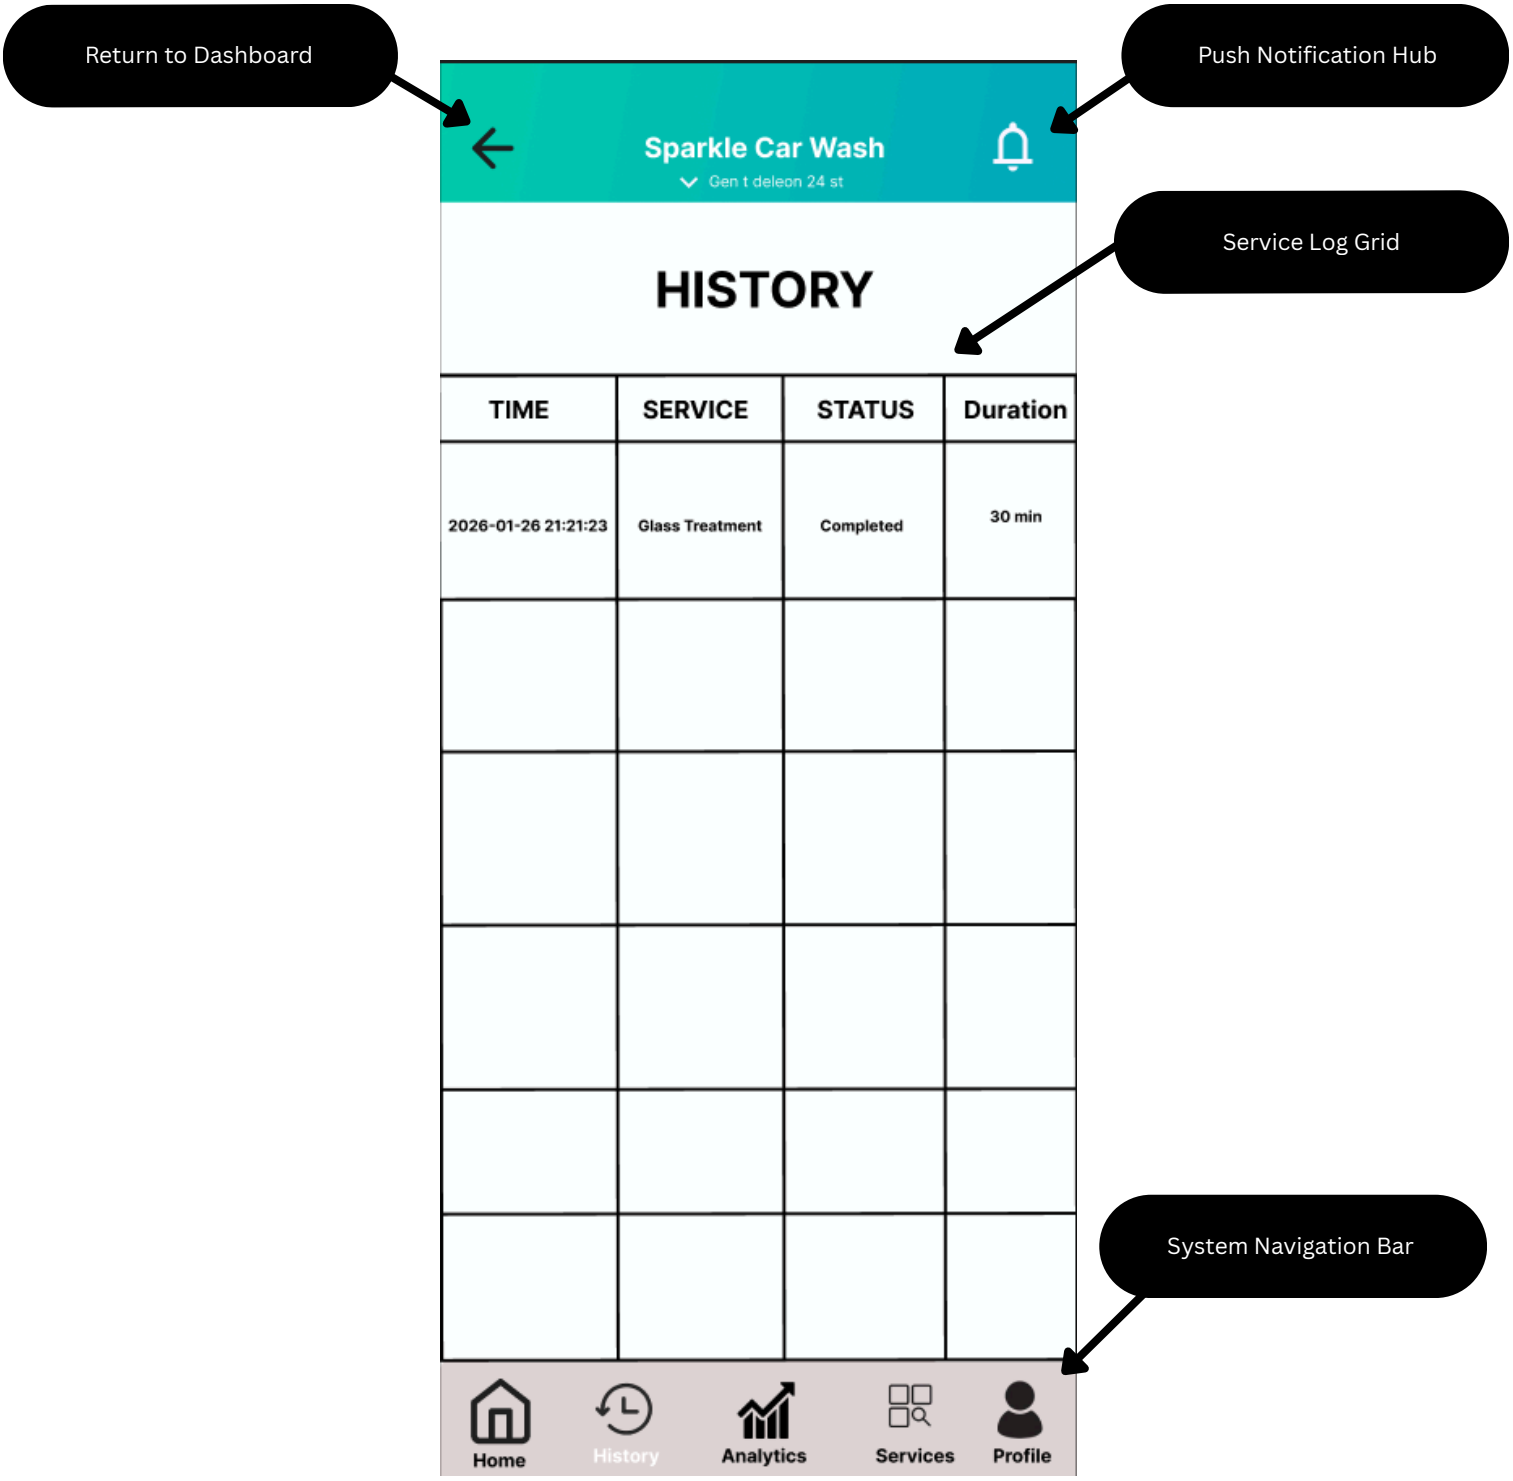
Dashboard / Home Screen



Purpose: This screen provides a real-time command center for owners to monitor active wash services and the current queue status at a glance.

Integration Goal: It centralizes incoming service data, allowing for efficient shop management and immediate visibility of operational capacity.

Records or Transaction View



Purpose: This screen maintains a digital log of completed services, tracking vehicle identifiers, wash types, and the duration of each task.

Integration Goal: By recording these metrics, the screen provides the raw data necessary for basic performance analytics and operational auditing without requiring a payment module.
